Training Instructors Needed

The National Older Worker Career Center

Seeking Instructors for National Air Program Training

The National Older Worker Career Center Instructional Service Program

- The National Older Worker Career Center (NOWCC) provides training services to air pollution control agency staff across the country.
- These services rely on a national training curriculum maintained by the U.S. Environmental Protection Agency (EPA) and a network of regional air quality organizations.
- NOWCC is seeking candidates to teach courses across the national curriculum on topics including but not limited to permitting, monitoring, inspections, hazardous air pollutants and modeling.
- If you are interested in becoming an instructor, please contact Mary Boyer, who helps manage NOWCC's instructional service program, for information about the opportunities available. There is an immediate opening for a National Air Compliance Training Instructor. Mary can be reached at 4mboyer@gmail.com.

About NOWCC

NOWCC is a national non-profit organization dedicated to promoting experienced workers as a valuable and critical component of the nation's workforce. Since its establishment in 1997, NOWCC has provided over 20 million hours of support for the federal workforce via a cadre of experienced workers serving mission critical needs at EPA and other federal agencies.

National Air Compliance Training Instructor Position Available

- NOWCC has funding from the U.S. EPA for a National Air Compliance Training instructor to work part-time from home and to travel to training sites as needed. The position will develop and update course materials and provide instructional services to enable Federal, State and Local air pollution agencies to perform air pollution control work, including inspection of air pollution sources. The candidate can be located anywhere in the continental U.S.

Required

- Age 55 +;
- Engineering/Scientific degree and proficiency in continuous emissions monitoring systems, compliance assurance monitoring, permitting and enforcement of requirements for boilers, turbines and internal combustion engines;
- Able to telework and travel anywhere in the USA.

More Information & Compensation

The ideal candidate must have a minimum of 15 years' experience working at a Federal, State or Local Air Quality Agency, possess excellent verbal and written communication skills; Ability to travel a minimum of one (1) week per month, multi-task, prioritizing and working independently is a plus. MS Word and Excel skills are highly desired. The compensation for this position is \$18.18 per hour.
