

NESCAUM Monitoring and Assessment Committee
Mission Statement
3/30/07

It is the mission of the Monitoring and Assessment Committee (MAC) to insure uniform approaches to regional air monitoring and data assessment in the Northeast by providing a forum for discussion and exchange of ideas regarding existing or emerging techniques and technologies. That forum will also provide feedback to the State Directors and to EPA on existing or proposed policies, regulations and strategies related to, or impacted by, air monitoring. The MAC will also from time to time, coordinate, specific monitoring or data assessment projects as assigned by the Directors.
